

## Solución estándar de cloruro sódico, 18 000 $\mu\text{S}/\text{cm}$ , 50 mL

# de producto: 2307426

### ARTICULO OBSOLETO

Este artículo ya no está disponible.

## Conductivity standard solutions for laboratory and field analyses

Estándar de conductividad. 10 246 mg/l de NaCl. 18 000  $\mu\text{S}/\text{cm}$ . Botella con tapón de vertido de 50 mL.

### Traceable to NIST standard reference materials

Whether in the laboratory or in the field, always perform measurement results you can trust is essential. The quality of the standard solutions that are used are key.

### Design for use with Hach meters portfolio and other meters.

The basis for accurate conductivity measurements is good care and calibration of the conductivity cell.

### Reliable packaging

Supplied in an airtight packaging ensuring guaranteed shelf-life.

---

## Especificaciones

|                                |                                                                                    |
|--------------------------------|------------------------------------------------------------------------------------|
| Cantidad:                      | 50 mL                                                                              |
| Concentración:                 | 18000 $\mu\text{S}/\text{cm}$ at 25°C $\pm$ 50 $\mu\text{S}/\text{cm}$ at 25°C     |
| Condiciones de almacenamiento: | 10 - 25 °C (protect from light)                                                    |
| Descripción:                   | Conductivity calibration solution                                                  |
| Fórmula:                       | NaCl                                                                               |
| Notas especiales:              | Observed shelf life after opening, following recommended storage and use: 3 months |
| Parámetro:                     | Conductivity                                                                       |
| Plataforma:                    | Solución                                                                           |
| Tipo de envase:                | Bottle                                                                             |
| Trazable a NIST:               | Sí                                                                                 |
